

Video title:

What do students do on a cyber placement?

Transcript:

There's no one task you'll undertake as a student at BT and that's because of the complexity of the work that we do, and the fact that we employ more people with cyber security skills than anyone else in the UK. So, there's lots of different projects that you can get involved in, be it software, be it tech consultancy, be it crypto, or many other areas related to cyber security. But there's always something you can apply your interest and passion to.
