

Video title:
Bursary student: Ben

Transcript:
Hi, I'm Ben, I'm the Managing Director at TryHackMe and I'm a previous CyberFirst student.

Title card: What does CyberFirst mean to you?

CyberFirst means opportunity to me. I was given access to training and industry leading companies that I would never have had access to that set me up for success after my studies.

Title card: How did the yearly bursary help you?

The monetary support from the CyberFirst scheme was incredible. It gave me the financial stability to be able to really focus on my university studies, and purchase other bits of technology that I would have not normally been able to.

Title card: What impact did the CyberFirst university bursary have on you?

Being a part of the CyberFirst community had a big impact on me personally, being able to speak to peers within the security community as well as everyone in the CyberFirst community. The programme had an enormous professional impact on me. So, during the scheme I acquired a plethora of skills, from setting up an active directory network all the way to learning these core programming concepts all contributed to my industry success.
