

Video title:

What are phishing scams?

Transcript:

Phishing scams are really popular low-cost tools for cyber criminals, and we see a lot of them in the NCSC. What they're essentially trying to do is trick you – trick you into either clicking on a link that takes you to a website that might have malicious software on it. Or, perhaps, giving up some secure credentials to someone you think you trust, but actually there's a cyber criminal behind there.
