

Video title:

Bursary student, James

Transcript:

I have just begun my summer placement as a CyberFirst bursary student, and what I was really surprised by was how quickly you're able to really get active in active work that's going on. But then also having that support there, you'll be allocated a point of contact in which organisation you got to work with. Being able to have that support there and a really supportive team, that's something which I've been very thankful for.
